Profile

I'm a front-end developer with a passion for building accessible and responsive web applications. I quickly learn new concepts and love adding to my growing skill set. I am a proactive problem solver who enjoys writing future-proof, understandable code that fosters collaboration with other developers.

Technical skills

- HTML 5 & CSS
- SCSS
- JavaScript
- React (Hooks & Classes)
- Tailwind CSS
- Responsive Design
- Vue.js
- WordPress
- Web Accessibility (WAVE, axe)
- Web Design
- RESTful APIs
- jQuery
- PHP
- Firebase
- Git Collaboration
- Software Troubleshooting

Professional skills

- Independent, or Teamed Work
- Customer Service

Experience

Dental Growth Strategies, H-Cube Marketing

Web Developer, May 2022 – July 2024

Building and maintaining websites for dental and wellness practices. New builds were created from PSD conversions or my own web design. I worked in various contexts as company practices evolved, including HTML/JavaScript with Firebase hosting, in-house PHP framework, and WordPress. I converted old WordPress sites to the preferred frameworks, fixed site problems as reported by SEM Rush, PageSpeed Insights, WAVE (Web Accessibility Evaluation Tool), and our Client Account Managers. Projects were organized and completed using Monday.com.

Freelance Web Developer

Client example: [Evangeline Gentle](#), Musician, 2022

Rebuilt a lost website and created a new custom WordPress theme with the original look. Implemented page, post, archive templates, primary and mobile navigations, widget area, functions.php etc. The client was back up and running in no time and they were empowered to edit their own content.

Client example: [Public Energy Performing Arts Inc.](#), 2021

Accessibility audit for local arts organization. WCAG 2.1 Level AA standard remediation, colour contrast, HTML refactoring, added missing alt attributes, tested and fixed mobile responsiveness, tested screen reader and keyboard only navigation and made improvements.

Market Hall Performing Arts Centre Inc.

Market Coordinator and Box Office Manager, June 2013 – March 2020

I managed the organization's box office, including in-bound telephone, online, and walk-up customer service queries and sales. Web content editing, event organization, promotional material design, and many other day-to-day office tasks. I assisted with a large variety of in-person live events over the years and communicated our sales and reports to the Board of Directors and other key stakeholders.

Education

Juno College of Technology

- Web Development Bootcamp, 2021
- Intro to Web Dev Intensive Course, 2021

Trent University

- Bachelor of Arts, 2009 – 2013
- Canadian Studies

Juno Projects

Out Of Context (REACT, JSX, AXIOS, SCSS)

Search a movie title and get GIFs representing themes from the movie. Worked as a team of four developers.

Infinity Corkboard (REACT, JSX, REST API, CSS)

Displays 4x4 grid of photos from NASA's API. User can click and change desired images in place.

Weather Scout (HTML, JS, REST API, SCSS)

Search by city to get same day or forecast weather data. Paired programming project.

Delicious (HTML, JS, REST API, SCSS)

A multi-page PSD conversion project for a fictional restaurant chain.
